2. About us

Buyrite Steel Supplies QLD is a dynamic, service-oriented company that specialises in reinforcing steel for commercial and residential construction.

Buyrite Steel Supplies QLD has developed an enviable reputation in a highly competitive marketplace through a business approach that focuses on meeting and exceeding customer expectations.

The company is headquartered on the Gold Coast from which it services the south-east Queensland region and beyond.

The company proudly services the broader construction and civil services industry, including some of the sector's highly active niche markets, each of which require a specialist approach to service delivery.

Buyrite QLD recognises that the processing of reinforcing steel in a precise and efficient manner is an integral part of the industry.

As a result, the company enhances its project delivery chain through an in-house scheduling and estimation service which is overseen by a team that has worked within the industry for more than 20 years.

From quotation to delivery, Buyrite QLD's clients receive a service that is second to none. Buyrite QLD manufactures and supplies all products related to the reinforcing steel industry, from mesh to stainless steel.

Buyrite QLD only supplies steel that meets the standards of the Australasian Certification Authority for Reinforcing Structural Steels, and only sells Australian-made mesh for concrete reinforcement.

Buyrite QLD adheres to quality fabrication procedures and ensures customer projects run smoothly through state-of-the-art processing equipment that creates top-quality products in a highly efficient manner. On-time delivery is further assured through Buyrite QLD's dedicated transport fleet which is supplemented by trusted contractors.

Buyrite QLD is also a company that prides itself on being engaged with the community and promoting cultural diversity. Buyrite QLD is currently in the process of developing its own RAP and is actively engaging with indigenous owned companies and has starting offering traineeships.
